logo for lid

File formats

„maligo®“ - comes with maligo® logo.

„YOUR LOGO Rainbow“ - we will give your logo the distinctive maligo® look.

„YOUR LOGO Classic“ - your logo colors will remain original.

## Design

We are going to place your logo on both the lid and the front.

Optionally, you can use a different logo on the lid than on the front (for example, a round logo on top and a wider one in front). After the purchase you can send us two different logos.

**E-Mail: [care@maligotattoo.com](mailto:care@maligotattoo.com)**

Usually we place the logo on a black background. Alternatively, you can design your label yourself if you want to have a colorful background. For this we need a document with bleed.

## 1 mm bleed on every side of the document

Only necessary for colorful backgrounds. You only need to make the document 2mm wider and 2mm higher (in relation to the desired final format). Don't put anything important too close to the edge. That's all we need, not even crop marks.

**Attention: The label on the back always remains the same as it is shown in the sample photos on our website and cannot be customized. The back label is always black with small maligo® logo.**

## Files

We prefer vector graphics or high-resolution PDFs or TIF, JPG, PSD, EPS, PNG.

## The color surprise

RGB shines brilliantly on the screen, but we will print in CMYK.  
To avoid disappointment, send us and CMYK data.
